OUR TECHNOLOGY //

DexShell uses advanced manufacturing techniques, which make it possible to weave material properties into a single fabric. This high spec technology creates garments that are more durable, more comfortable and more reliable, than our leading rivals. Through our consistent and enthusiastic research we have become specialists in material construction, allowing us to source and work with the world's most high spec technology.

Our element repellent range and our innovative and stylish selection of socks, hats and gloves, ensure that whatever protection you are seeking you can trust DexShell to deliver. Using natural fibres, DexShell products not only care for your skin but importantly are gentle on the environment too.

THREE LAYER CONSTRUCTION //

Our desire for innovation has driven our research and manufacturing capabilities from the outset and will continue to do so. The use of Porelle; the most reliable membrane available and a leader in hydrophilic and micro-porous innovation, is far superior to anything used by any of our competitors.

DexShell is proud of its extensive range of functional, waterproof and breathable knitted accessories. We set out to create products that will enhance the experience of active outdoor enthusiasts in difficult and challenging weather and terrain, minimizing the detrimental effects of these conditions on performance and enjoyment.

Invest in DexShell and the benefits of each product are clear right from the start and throughout their life span. Our products are proven across a wide range of outdoor pursuits, supporting outdoor enthusiasts as well as members of the armed forces and emergency services. In short if you venture outdoors for work or play, DexShell has you covered!

PASSION FOR INNOVATION.

Consistent technological and product innovations are behind the success of DexShell's waterproof, yet breathable socks, gloves and hats. This desire and passion for innovation has driven the brand's product development and manufacturing capabilities since its inception. Continuous research ensures that DexShell source the most high spec materials with the best suppliers across the globe.

DexShell DexTretch™

DexShell's patented 4-way stretch lamination process (DEXTRETCH™) provides greater freedom of movement to the wearer. The sock outer and inner components with our engineered knitting composition are laminated with the membrane interlining using a micro dotting process. This features greater stretch in both warp and weft directions allowing the composite fabric to be far more flexible which, in turn, provides wearers with a snug and comfortable fit.

DexShell DexFuze™

DexShell's DEXFUZE™ technology was first developed in 2018. The technology bonds the performance glove liner and the ergonomic outer shell together by our micro dotting lamination process with the waterproof breathable membrane sandwiched in between. This unique construction eliminates the movement between the fabric layers and provides much better fit and handling dexterity to wearers thus significantly enhances the hand control and grip.

DexShell DexLok™

DexShell's patent pending DEXLOK™ technology was developed for stopping water from coming into the sock at the top and from soaking in when it is immersed. This design provides a real sense of being 100% waterproof and enables users to stay completely dry across and in the river.

OEKO-TEX® STANDARD 100

We are pleased to announce that the full range of DexShell waterproof socks has been awarded the Standard 100 by OEKO-TEX®. This award is one of the world's most respected marks for products that have been tested for harmful substances. It means that DexShell, being a responsible brand, is moving toward the direction of less and less impact to the environments although this is just a small step of us.

DexShell is committed to taking further approaches of making its products more sustainable and contributing its part for a greener world.

KIND BY NATURE.

DexShell products are created with your activities in mind. We strive to produce durable but affordable waterproof accessories, whilst keeping our impact on the environment, which is why we use natural resources or recycled materials in our products such as Bamboo rayon or Repreve lining. DexShell products not only care for your skin but are also gentle on the environment too.

SOCKS

SOCKS

Functional yet stylish, waterproof yet breathable, all combined with excellent comfort and great durability make DexShell's market leading sock range the ideal choice for anyone heading outdoors. Our premium quality knitted socks offer high protection and high performance at a price you can afford. DexShell have always been proud to offer outstanding value for money and this continues this year meaning that the ultimate waterproof sock is as affordable as ever – for work or play.

Ideal for any outdoor activity and with total protection guaranteed without the need for special treatments after purchase, DexShell socks have become the number one choice for outdoor enthusiasts and outdoor workers across the world. Our technically advanced socks are also available for children with multiple style options available.

PRO VISIBILITY

The waterproof breathable Pro Visibility Socks were designed to have the reflective stripes around the cuff area, to make sure you're visible when you do running, cycling, or other activities in the dark. The socks are constructed with the light weight moisture wicking COOLMAX® FX liners to keep your feet dry and comfortable in those muddy or rainy weather conditions.

GLOVES

GLOVES

Completely waterproof yet highly breathable gloves, in a choice of patterns and colours, and in four sizes. Feel supremely confident in element repellent all weather gloves – manufactured with porelle® membranes as waterproof knitted recreational wear or work-wear.

Grip Control is critical, when participating in some recreational pursuits (motor-biking, cycling, climbing...). Reduce the risk of grip loss considerably by always wearing DexShell gloves, making you feel 100 per cent in control. Keep your hands warm and protected as much as possible, by settling for nothing less than the very best.

Don't worry though that the very best will come with a premium price tag. As with all our products, DexShell gloves offer excellent value for money. Sensibly priced and with proven durability, let our gloves protect your hands from all that nature can throw at them for years to come.

Like other DexShell products, our gloves come with a Porelle waterproof and breathable membrane which serves as a barrier to water whilst still providing excellent breathable characteristics to let the sweat out. No more wet, cold hands.

SIZE GUIDE //

WATERPROOF SOCKS & OVERSHOES

The chart shows the general guideline for DexShell socks and overshoes (unisex). If you are in between sizes then we recommend choosing a larger size.

SIZE	EURO	UK	US (MEN)	US (WOMEN)	CM
SMALL	36-38	3-5	4-6	5-7	22-24
MEDIUM	39-42	6-8	6.5-9	7.5-10	24-26
LARGE	43-46	9-11	9.5-12	10.5-13	26-28
X LARGE	47-49	12-14	12.5-14.5		28-30

WATERPROOF CHILDREN'S SOCKS

SIZE	EURO	UK	US	CM
SMALL	28-30	9-12	11-12.5	16-18
MEDIUM	30-33	12-1	13-2	18-20
LARGE	33-36	1-3	2-4	20-22

WATERPROOF GLOVES

Use the method illustrated below and find the approximate glove size appropriate for you. No two hands are alike and finger length relative to palm size ranges from person to person so the best way to decide a perfect fit is of course to try them on.

SIZE(UNISEX)	EURO	A(CM)	A(INCH)	B(CM)	B(INCH)
SMALL	7	18-20	7-8	18-19	7
MEDIUM	8	20-23	8-9	19-20	7 1/2
LARGE	9	23-25	9-10	20-21	8
X LARGE	10	25-27	10-11	21-22	8 1/2

WATERPROOF HATS

	SIZE	CM	INCH
CHILDREN	One Size	53-56	21"-22"
ADULT	S / M (One Size)	56-58	22"-23"
	L / XL	58-60	23"-23.6"

CARE INSTRUCTION

DexShell is not a pair of conventional socks or gloves but a pair of composite laminated products, and proper care is necessary to ensure their continued performance. Improper treatment may even damage the products, so please observe the symbols carefully. Take care not to puncture the membrane in the fabric or it will leak. Always wear the socks with shoes as wearing them without might damage their performance barrier. Proper care of your DexShell socks, gloves and hats will lengthen the life of the products.

DexShell Socks & Knitted Gloves

Maximum temperature 40°C (104°F), mild process. Do not bleach. Drip line drying. Tumble dry low. Do not iron. Do not dry clean. Do not wring out.
